

To whom it concerns

02 December 2024

RoHS 3 & REACH Regulations

This is to confirm that all Carbon and Alloy Steels, Stainless, Aluminium and Copper Alloys used in the manufacture of Boneham & Turner's standard products comply with the requirements of the European Union REACH Article 33 legislation (1907/2006) and do not contain reportable amounts of the currently published list of SVHC, including the new substances added on 23rd January 2024 by the ECHA (totalling 240 substances).

Products do not, to the best of our knowledge, contain substances more than the Maximum Concentration Value (MCV) as outlined in the directive 2015/863 known as RoHS 3, in force July 22, 2019.

Where the customer specifies the material, then it is the customer's responsibility to ensure that the material(s) specified, conform to applicable Directives.

Yours sincerely,

FOR & ON BEHALF OF BONEHAM & TURNER LTD

r

Stacy Denton-Beaumont
